Recruitment is open for a 2-year trial of Stellest myopia control spectacle lenses. We need your help to identify **18-40 year old progressing myopes** who might like to take part...

ELIGIBILITY CRITERIA

Inclusion Criteria

Aged 18-40 years at enrolment

At least -1.00D in both eyes by cyclo autorefraction (you don't need to do this, we'll check it at screening)

Myopia progression of at least 0.50D in the previous two-year period

Astigmatism and anisometropia $\leq 1.50D$

Visual acuity 0.1 logMAR (~6/7.5) or better in both eyes

Free of ocular and systemic abnormalities that might affect visual functions or refractive development

Exclusion Criteria

Manifest strabismus (checked by cover test at far and near)

Use of optical myopia control interventions (multifocal soft contact lenses, progressive addition lenses, bifocal lenses, orthokeratology or myopia-prevention drug use e.g. atropine) for other than a trial (2-week max) period.

Previous adverse reaction to the eye drops used in the protocol (tropicamide).

Anyone fitting the criteria above and interested in participating should get in touch via email so that we can arrange a screening appointment.
